## 1707 LYNWOOD COURT

### FEATURES

Come experience this remarkable home within a tranquil setting offering an exceptional lifestyle. This two-owner home was designed and built by a partner with world renowned architectural firm Skidmore Owings Merrill. The second owner carefully selected updates such as the metal roof to maintain the home's original integrity. The entrance with marble topped built-ins flows into the formal living room that provides a stunning two-story wall of glass exposure to the tree lined back yard. Two master suites provide the flexibility to accommodate a multi- generational family or offer visitors a private guest suite on the second floor. The European kitchen features Miele appliances: oven, warming drawer, cooktop and coffee maker, Liebherr refrigerator, U-Line wine captain. With the adjoining family room, two sliding glass doors open to the side deck that overlooks a walled garden. The second story includes an expansive 28' long built-in bookcase with a reading nook that overlooks the living room. The home includes a private study that leads to a second story art studio with yet another wall of glass. Designers touches throughout: custom double teak front doors, 8' doors throughout, white walls that offer a gallery setting, built-ins in almost every room, two wood burning fireplaces, can lighting, oak and marble floors. Extraordinary!
